### **DETAILED ACTION**

1. The indicated allowability of claims 40,41, and 43 is withdrawn upon reconsideration of the art of record. The finality of the previous Office action is vacated and rejections on the merits follow.

#### ***Claim Rejections - 35 USC § 112***

2. Claims 40 and 41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is an inconsistency regarding the structure of the hinge in the claims. Claim 40 recites at least one of the first and second plates has means for precluding sliding movement. Claim 41 recites that both plates have means for precluding sliding movement. It is suggested "at least one of" be deleted in claim 40.

#### ***Claim Rejections - 35 USC § 103***

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

4. Claim 43 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chkudua (US 6,196,232).

Disclosed by Chkudua is a magnetic hinge comprising a first hinge plate<sup>14</sup> and a second hinge plate <sup>12</sup>, both of non-magnetic material and each having at least one magnet <sup>74,42</sup>, respectively, disposed therein. The magnets are inherently oriented in the same magnetic orientation and are parallel when the hinge is closed as seen in figure 2 and are in non-overlapping and opposite magnetic orientations with the hinge is opened as seen in figure 1. Chkudua does not specifically teach the magnets are rectangular.

Art Unit: 3727

It would have been obvious to one having ordinary skill in the art at the time the invention was made to utilize magnets of a rectangular shape (and make the apertures of a corresponding rectangular shape) since such a modification would have involved a mere change in the shape of a component. A change in shape is generally recognized as being within the level of ordinary skill in the art. Doing so allows for utilizing other magnets as taught by Chkudua.

### ***Response to Arguments***

5. Applicant's arguments, filed July 6, 2005, with respect to the non-statutory double patenting rejection have been fully considered and are persuasive. The rejection of claims 40,41 and 43 has been withdrawn.

### ***Conclusion***

6. In view of the new grounds of rejection, this Office action is made non-final.

7. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (703) 872-9306. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.

8. It is called to applicant's attention that if a communication is faxed before the reply time has expired, applicant may submit the reply with a "Certificate of Facsimile" which merely asserts that the reply is being faxed on a given date. So faxed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:

I hereby certify that this correspondence for Application Serial No. \_\_\_\_\_ is being facsimiled to The U.S. Patent and Trademark Office via fax number 571-273-8300 on the date shown below:
